

Rectangular Collectors

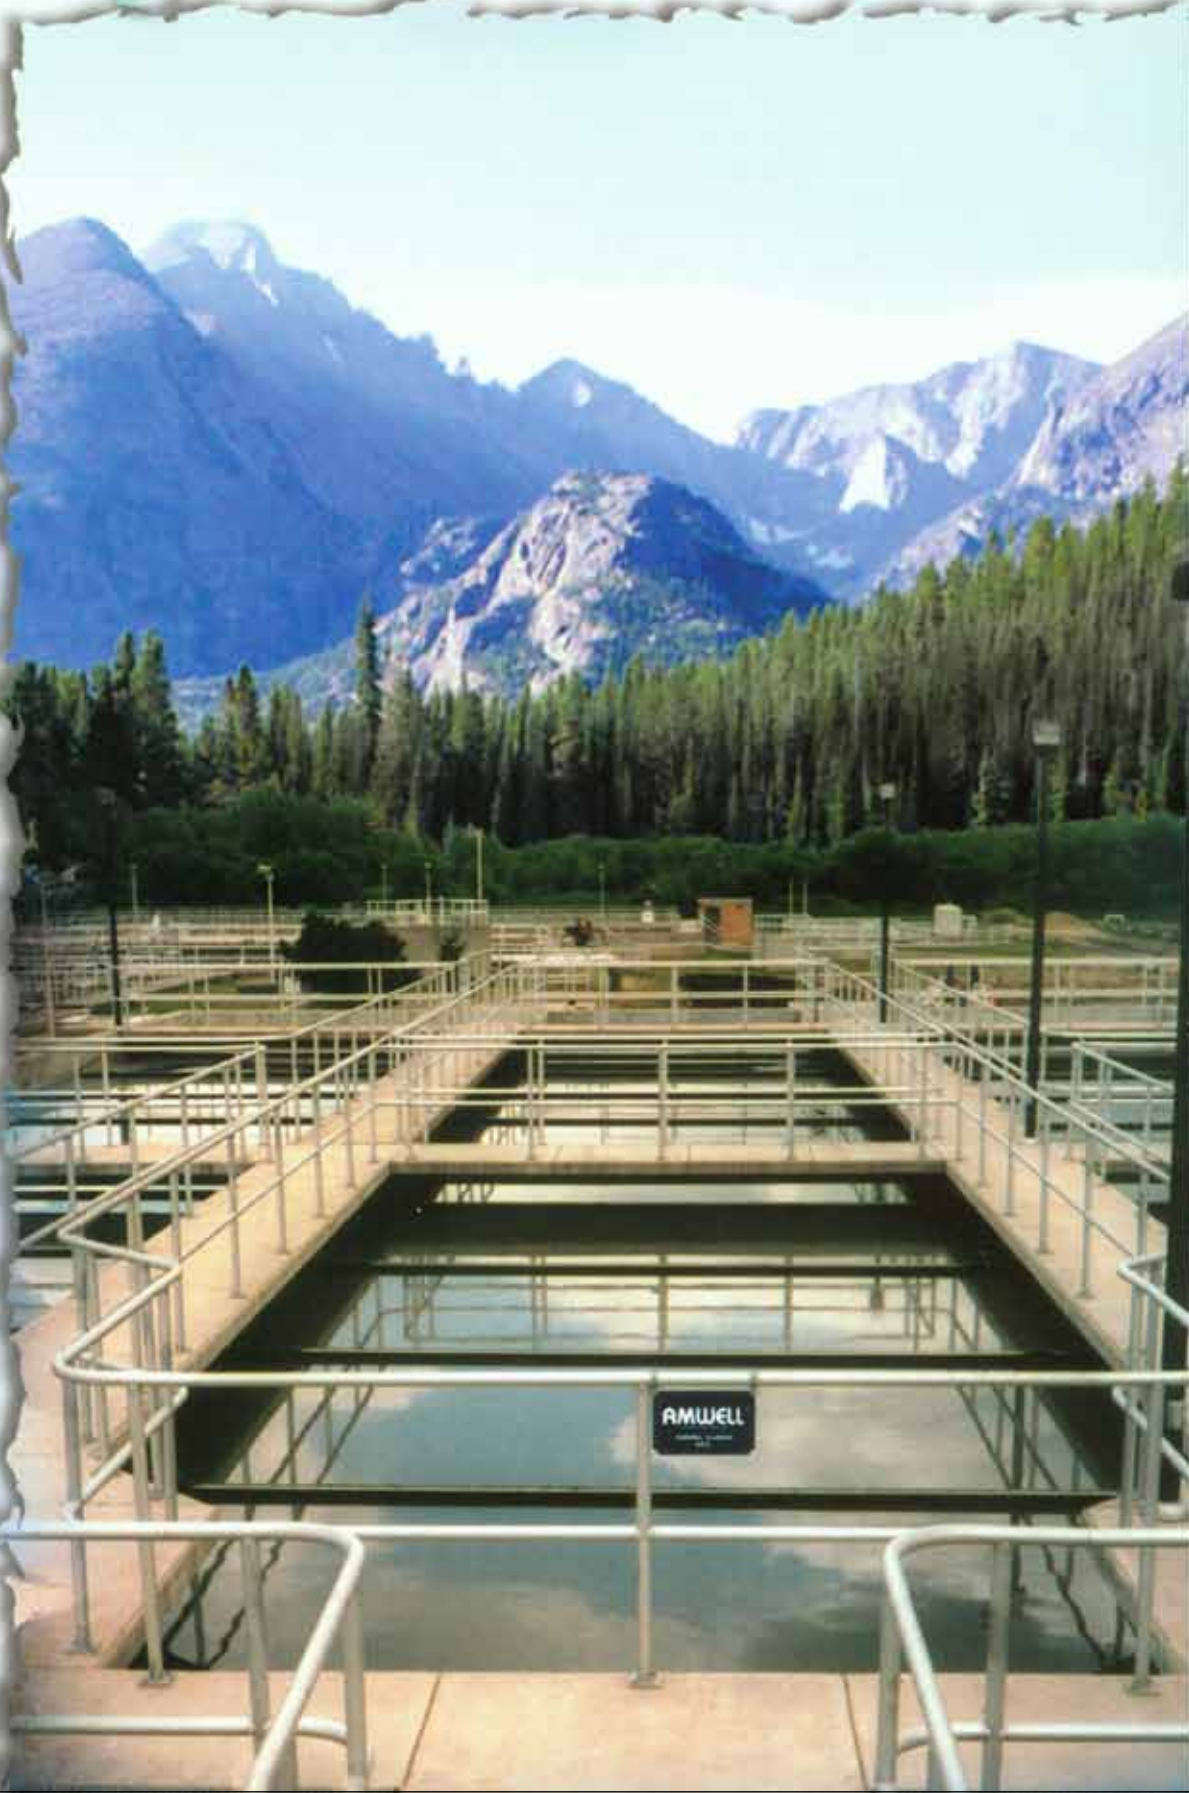

Amwell offers comprehensive integrated systems for single and multiple collectors up to 30 ft. wide by 250 ft. long. Amwell systems and accessories include either metallic or corrosion-proof, non-metallic Hydrolink® chain and flights. Slotted pipe skimmers are also available to match a wide range of collector applications.

Heavy-duty Amwell collector systems offer years of dependable, trouble-free operation.

- Heavy-duty, overload protected drives
- Hydrolink® non-metallic chain and components
- "Peak-cap" bearing design with metallic or non-metallic liners
- Individual or clutch controlled multiple collector operation
- Manual or motor controlled pipe skimmers
- Full width shaft with bearings, stainless steel stub shafts, or full width static shafts with non-metallic sleeves
- Fiberglass flights
- Non-metallic wear strips

AMWELL

Quality

Components and Accessories

Amwell offers the industry's highest quality water and wastewater treatment systems and components and has engineered numerous rectangular collector systems for a wide variety of cost effective applications.

Amwell collector systems provide optimum efficiency, flexibility and cost effectiveness. Beginning with Amwells heavy-duty, overload protected drives available in single, double or triple shaft configurations. Jaw clutches provide individual collector isolation for operational flexibility.

Hydrolink® corrosion-resistant, plastic chain and components reduce chain weight by 75%, which in turn reduces energy demand. Lightweight, non-metallic split design sprockets cut installation costs and are available in a full range of sizes.

For comprehensive product specifications, drawings and additional options for any system, contact Amwell headquarters or your local Amwell Representative.

Hydrolink® Chain

Manual lever operated, manual worm gear operated or motor driven slotted pipe surface skimmers are available to optimize scum removal from the liquid surface.
